Mountain Weather Forecast

Snowdonia National Park

Forecast valid from 06:00 on Saturday 18 Jun 2022 until 23:59 on Sunday 19 Jun 2022

Forecast Issued on Saturday 18 Jun 2022 at 04:04

Confidence: Low for extent and timing of any rain Saturday. Otherwise high for re-establishment of fine, fresher conditions from Sunday onwards.

Headline for Saturday 18 Jun 2022: A markedly fresher day, probably staying mostly dry but rather cloudy, with rain stalling nearby to the south, and likely to make only brief erratic inroads northwards later.

Mountain weather hazards on Saturday 18 Jun 2022

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Low Likelihood
Thunderstorms Low Likelihood	**Heavy persistent rain** Low Likelihood	**Strong sunlight** Low Likelihood

Forecast for Saturday 18 Jun 2022

Weather: Notably high uncertainty in timing and extent of any rain through Saturday. Much fresher than on Friday, but at the expense of fine weather. Rather cloudy conditions increasingly likely this morning, to give a chance of some patchy rain briefly for a time this afternoon. This likely only light and intermittent, before clearing away south later in the evening.

Chance of cloud-free hill tops above 800m: 60% at first, otherwise likely 90% for most of the day.

Low Cloud and visibility: Slopes probably largely free of cloud for most of the day, with visibility likely only briefly deteriorating in any early summit cloud, and perhaps any brief patchy rain this afternoon.

Meteorologist's View

Temperatures will be significantly down on Friday's, perhaps more significantly than shown later in the day should rainfall detail alter.

Forecast for Sunday 19 Jun 2022

Weather: A much brighter day than on Saturday, with sunny spells and patchy cloud above the peaks. Remaining much fresher than on Friday.

Maximum wind: Northwesterly becoming northeasterly 20mph.

Chance of cloud-free hill tops above 800m: 90%

Low Cloud and visibility: Early patchy cloud down to around 600 metres should soon disperse, with visibility likely to be very good thereafter.

Temperature: **Valleys:** Plus 3 becoming plus 18 degrees Celsius.
At 800m: Plus 9 degrees Celsius.
Freezing level: Well above the peaks.
